

A high quality polyester pleating tape with superb full width pockets designed to accommodate a variety of pinch pleat hooks.

Constructed to an exacting standard to create regular pinch pleats of variable fullness.

Pockets

A single row of full width pockets to accommodate a variety of pinch pleat hooks.

The position of the top of the curtain is determined by the length of the neck on the hook. The pockets are sealed at the top for additional strength so the tape must be applied with the sewing line at the bottom.

Make Up

The tape is available as 50m rolls and 100m rolls

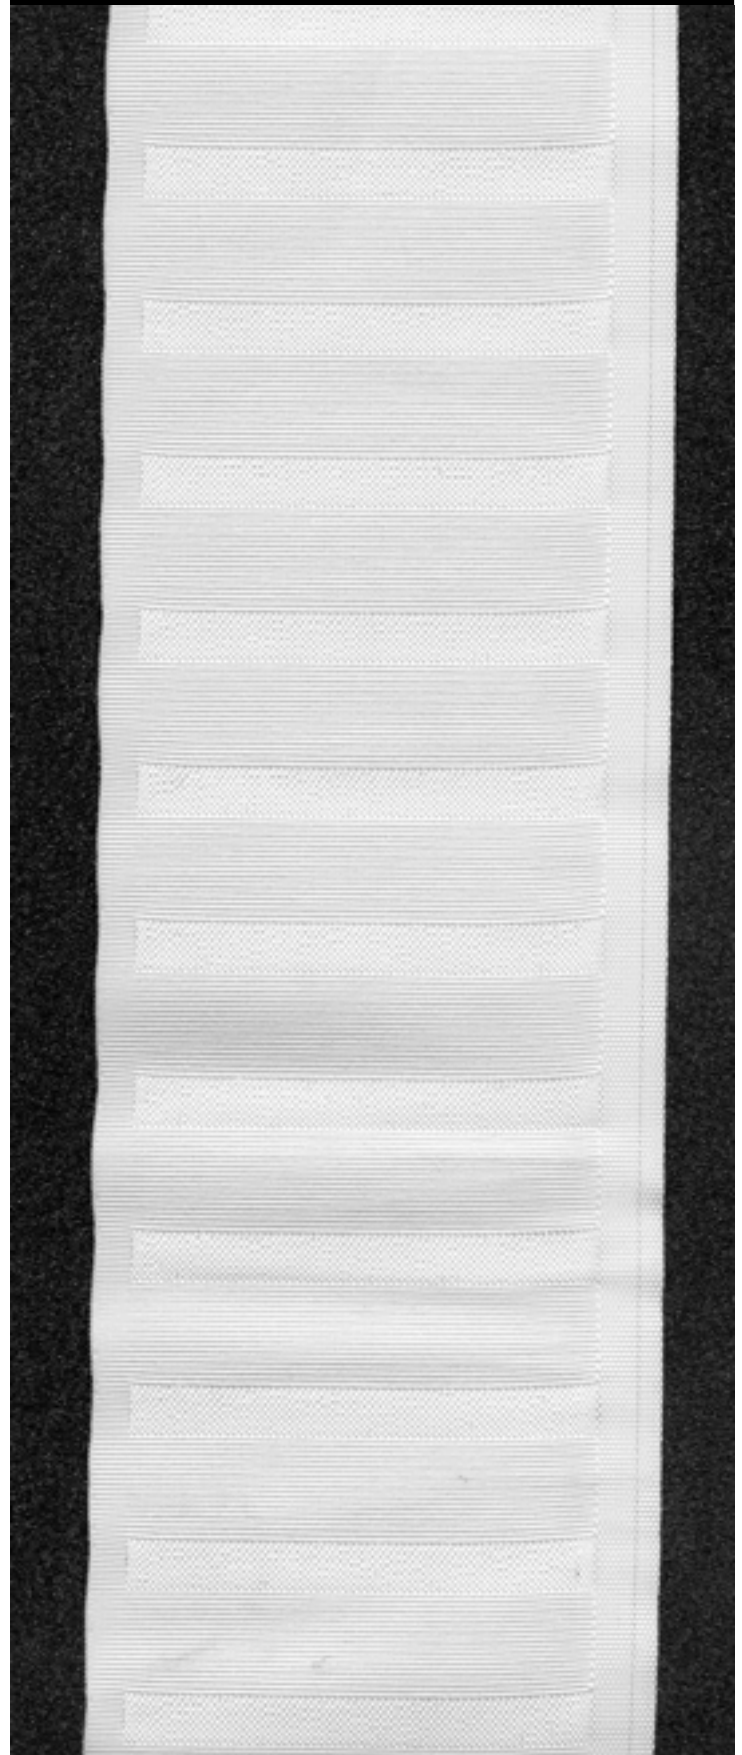

This high quality tape will complement medium weight fabrics.

With four pronged hooks, two three or four pockets can be left between each hook or a different number between the two outer pockets and the central pocket for an irregular pinch pleat.

Pleater Tape

High Quality Tape
For variable Pleat
