

This new design in multi-pocket tape was developed in consultation with our customers to overcome outstanding issues with existing products and improve on the qualities of its predecessors.

The tape features 8 sets of cords spaced across the full width of the tape. On lightweight fabrics each set can serve as a pocket but we recommend that in order to hold the hooks in place at least 6 pocket cords are used. This gives over 40 variations allowing the curtains to be precisely placed.

- *3 draw-cords set in tubes for a luxurious "D" style pencil pleat*
- *2.3 times fullness*

Make Up

The tape is available on 50 or 100m rolls and in 500m contract boxes

No hidden pockets. Other multi-pocket tapes have an additional row of pockets that are hidden when the tape is pleated. With the high weft density and additional spacing between pockets there is less tendency for pocket cords to pull. Pocket stretch and sag is almost eliminated.

The draw cords are set well away from the edge of the tape reducing the possibility of the cords being sewn down during production.

76mm Multi-cord Pocket Pencil Pleat
